First Floor

Second Floor

Grace First Baptist Church Youth and Senior Center, San Antonio, Texas

The brick matches the existing campus. The inviting warm look of wood is provided by durable cement composite panels.

Concept 6

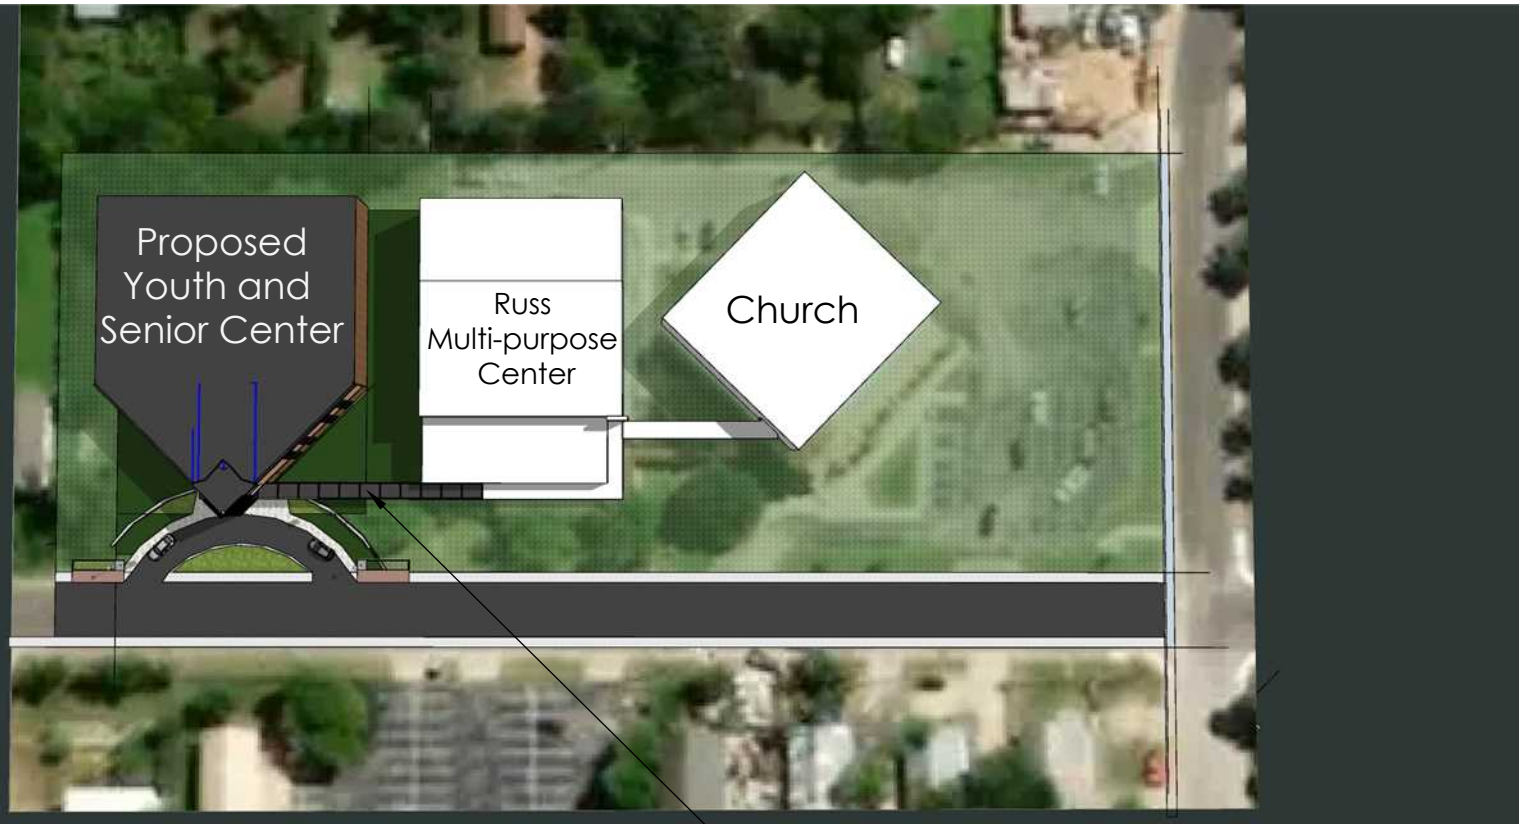

The exterior design was developed to be sensitive to the existing campus, the surrounding neighborhood and the activities contained within the Center.

The placement of the church, angular to the street, established a strong presence on the streetscape. The proposed Youth and Senior Center provides a visual bookend to the campus.

The circle drive provides convenient drop off of children or pick up of adults.

The glazed, daylighted lobby space welcomes the visitors in the daytime and provides a welcoming glow for evening activities.

Covered canopies can extend from the church to the new center.
